

## **Postdoc position and research fellowship available at ITB-CNR, Milan**

A postdoc position and a research fellowship (borsa di studio) with future possibility to enroll in a PhD program are available in the lab of Dr. Marie-Louise Bang at the Istituto Tecnologie Biomediche (ITB), CNR, Milan. The laboratory focuses on studying functional roles of sarcomeric and cytoskeletal proteins in cardiac and skeletal muscle development, function, and disease by utilizing genetically engineered mouse models and a range of molecular, biochemical, and cell biological techniques.

Candidates with significant experience in molecular biology, cell biology and biochemistry and a strong interest in cardiac and skeletal muscle biology are encouraged to apply. Experience with mouse models is preferred, but not a requirement. Successful candidates should be highly motivated, display initiative and independence, and have good verbal and written English communication skills. Salary will be based on experience. For consideration, please send a cover letter, including CV and three names of references with contact information by e-mail to: [marielouise.bang@itb.cnr.it](mailto:marielouise.bang@itb.cnr.it)

Please send application (including cover letter, CV, and 3 references) to:
